## Strengthening partnerships for a sustainable future

Between 2000 and 2030 the urban population is expected to double with the most significant growth happening in secondary cities.

How the world urbanizes is as important as urbanization itself

## Partnerships can help to make cities more inclusive, safe, resilient and sustainable

## What is the Habitat III Joint Work Programme of the Cities Alliance partnership?

The Cities Alliance partnership has established the Habitat III Joint Work Programme to support the preparation process towards the Habitat III conference by highlighting the crucial role of partnerships between national governments, local authorities and organised civil society for the implementation of the New Urban Agenda.
