Launch of APEC Report – “Partnerships for the Sustainable Development of Cities in the APEC Region”

Thursday, 8 February, 2018 | Time: 14:00 – 15:00 | Location: Urban Library

Partnerships involving collaboration is a new business model for development as the world moves towards a more sharing global economy. The event will explore the way cities in the region are supporting partnerships for sustainable development. It builds on previous APEC work on sustainable urbanisation, using 14 case studies to assess economies, infrastructure, social and environmental systems and urban governance. It evaluates cities at secondary city, metropolitan region, and regional economic trade-corridor levels.

An overview of national urban laws in Latin America and the Caribbean: case studies from Brazil, Colombia and Ecuador

Thursday, 8 February 2018 | 12:00 – 13:00

Location: Cities Alliance Booth – Hall 5, Booth No. 120

Latin America countries have been at the forefront of new approaches to cities and the Right to the City. Overall, they are well positioned to formulate new and innovative national policy frameworks that reflect the institutional, economic and social contours of the world's most urban continent, and which will be essential in responding to the challenges of implementing Agenda 2030 for Sustainable Development.

This trilingual publication, co-organized and endorsed by members and partners in the forefront of the urban sector, is a collaborative effort of mapping and compiling national urban legislation in the region under the perspective of the global agendas.

Enhancing Connectivity: A Key to the Development of Secondary Cities

Saturday, 10 February 2018 | 16:00 – 17:00

Location: Cities Alliance Booth – Hall 5, Booth No. 120

Enhancing connectivity between cities is recognized as a significant factor in supporting local economic development. Towns and cities which have elevated levels of connectedness to markets, transport services, ITC and knowledge networks tend to perform better and grow faster than those where connectivity and accessibility to markets and services is constrained. Prof. Brian Roberts will present ways on how to measure and improve connectivity in supporting the development of secondary cities. It will be followed by an open discussion and Q&A session facilitated by the Cities Alliance Secretariat.
